

# How to Add GovPayNet® Payment Options to Your Public Website

Making the public aware of their payment options on your website is essential in maximizing the success of your GovPayNet® service. It's simple, too, with the addition of a ready-to-use payment button and your GovPayNet-specific payment link. Just follow these few simple steps:

1. Visit our resource library at [www.govpaynet.com/library](http://www.govpaynet.com/library).
  2. Select "Buttons & Logos" under the "Website Update Tools" section of page.
  3. View the different payment buttons available and click on the one you would like to post to your website.
  4. Save the image as a jpeg for use on your agency website.
  5. Ask your Web master to insert the image into your homepage and link it to your GovPayNet-specific payment link. This will link payers directly to your payments on [www.GovPayNow.com](http://www.GovPayNow.com). You should have received this link (or links) via email.
  6. Utilize your marketing communications to remind the public to look for the GovPayNet payment button on your site.
- You can also have full access to additional marketing tools (including a sample website landing page) at [www.govpaynet.com/library](http://www.govpaynet.com/library).
